AVAILABLE OPTIONS

- There are no available options for this model.

DESCRIPTION

The table top controller MT-01 is the entry level basic station controller in the **DEMCO WEDGE** line. It has the capability to operate a single stand alone station on any table top.

The system comes with all required hardware. Safety is provided by a set of non-contact anti-tie down buttons, alarms are displayed and reset from the operator panel. A holder is provided to mount a workpiece nest.

The operator simply loads the nest, depresses the pair of safety buttons, and the station performs it's cycle.

This system is ideal for small production and prototype runs. It also is commonly used to set-up, program, and maintain stations.
